

Finish note using Suki on web

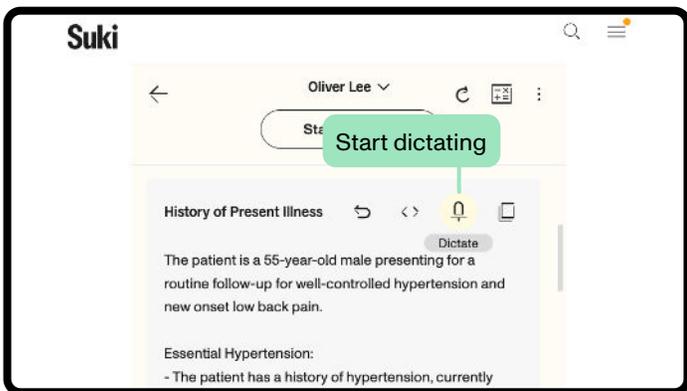

Learn how to copy content to your EHR using Suki on web.

1 Log into web

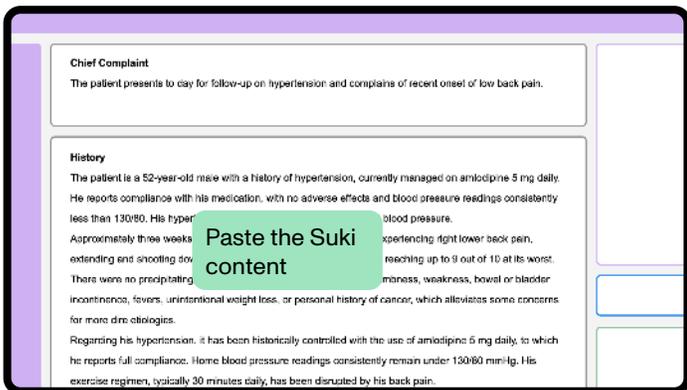

Log into Suki Assistant on web using your web browser.
<https://app.suki.ai>

3 Edit note

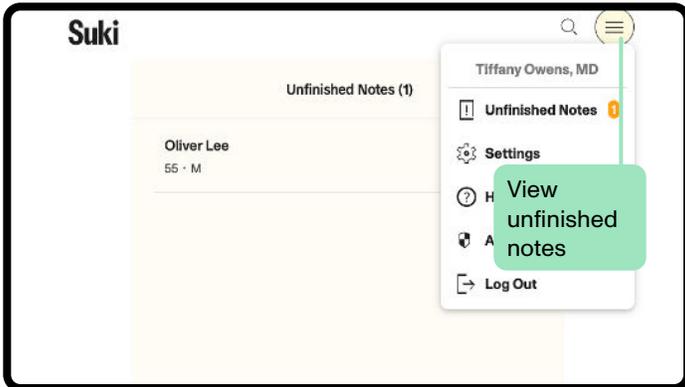

You can make changes to your note by selecting a place in the text and clicking the microphone icon.

5 Paste into EHR

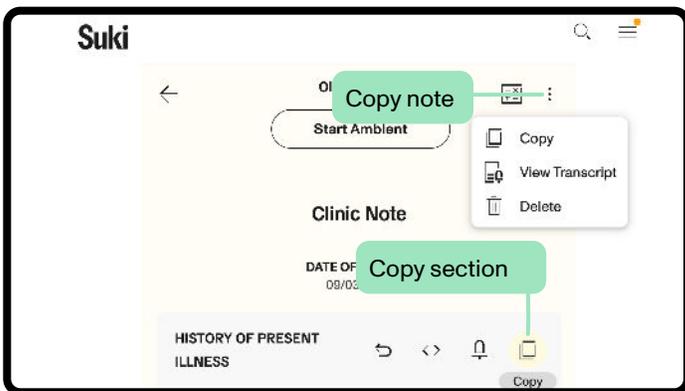

In your EHR, click into the field where you want to paste Suki content. Type **Control-V** to paste the text.

2 View unfinished notes

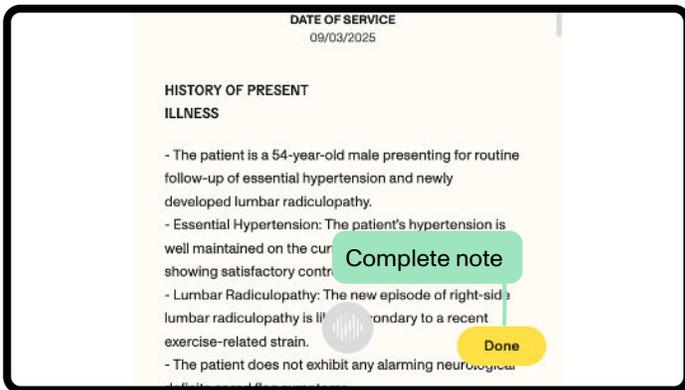

To view a list of your unfinished notes, click the menu and select **Unfinished Notes**. Click any note to open it.

4 Copy note sections

To copy the whole note, use the kebab menu. To copy the contents of a section, hover the mouse over the section. Click **Copy**.

6 Complete note

When you're done with the note, click **Done** to clear the note from your Unfinished notes list.
