

eSOne InstaNote by DeliverHealth

The eSOne (eScriptionOne) mobile app with the InstaNote back end captures operative notes in real time (typically under two minutes), so you can spend less time at your desk and more time doing what matters most.

Benefits

Fewer edits, and faster sign-off

Recording from your mobile device delivers significantly better audio than traditional call-ins. This means higher-quality drafts right from the start.

Confidence at a glance

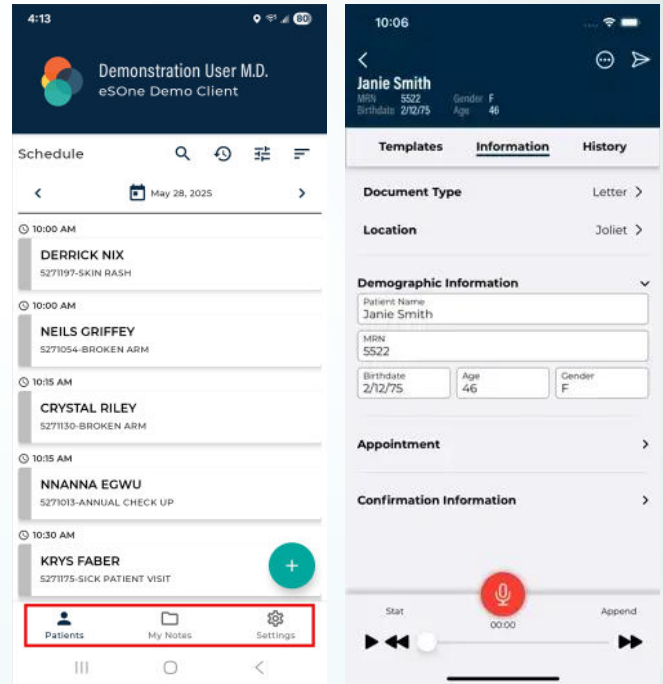

Visual confirmation of document type and patient demographics, so you always know whether you're in the right chart.

Your workflow made easier

Easily add date of service, additional authenticators, and carbon copy recipients in just a few taps.

Set it once, benefit every time

Personalize your defaults and favorites, to streamline your documentation from the very first use.

Get started

- Contact your representative to provide a valid email address and confirm your user name.
- To download the app, search the App Store/Google Play for **eSOne**.
- Your representative can provide you with quick start and full user guides, eLearning videos, and live remote training upon request.

Initial login

- Enter your username (case sensitive) and client code **UABSTV**.
- Click on Forgot Password.
- Set your password through the link provided in the generated email.
